EXECUTIVE SUMMARY

Seasoned Product Owner and Engineering Leader with over a decade of cross-functional experience across FnB and insurance/fintech ecosystems. Proven expertise spanning payment channel integrations, zero-downtime serverless architecture migrations, and building scalable engineering teams from the ground up.

Skilled at translating complex business requirements into clean, resilient software architecture and driving user-friendly product experiences.

CORE COMPETENCIES & TECHNICAL SKILLS

Product & Leadership: Product Ownership, Roadmaps, Agile/Scrum Delivery, Cross-functional Leadership, Tech Budgets & KPIs

Cloud & Architecture: AWS Lambda (Serverless), Microservices, CI/CD Automated Pipelines, Zero-Downtime System Migrations

Engineering & Payments: Payment Gateways (VA, E-Wallets, Cards), TypeScript, JavaScript, Go, PHP (Laravel, CodeIgniter), REST APIs, Git

PROFESSIONAL EXPERIENCE

Product Owner | IFG Life — Sep 2026 – Present • Jakarta, Indonesia

- Managing payment channel integrations — Virtual Accounts, e-wallets, credit, and debit cards.
- Making sure policyholders can check out and pay quickly without confusing errors or failed transactions.
- Partnering with cross-functional engineering and compliance teams to maximize checkout success rates.

DevOps & Tech Lead | Boojoog Cloud — Jun 2025 – Sep 2026 • Tangerang, Banten, Indonesia

- Led engineering teams building cloud solutions, solid infrastructure, and dependable software.
- Tested and introduced new tools to make systems faster, safer, and ready to scale.

IT R&D Manager | Dailybox (PT. Sendok Garpu Internasional) — Oct 2017 – Jun 2025 • Jakarta, Indonesia

- Spent nearly 8 years building tech solutions for a fast-growing multi-brand food & beverage enterprise.
- Turned business ideas into practical digital operational tools that delivered everyday commercial value.
- Nurtured and balanced engineering teams to maintain high velocity and quality without developer burnout.

IT Manager | Krestech — Feb 2016 – Jun 2025 • Jakarta Barat, Indonesia

- Built the entire IT department and developer culture from ground zero.
- Rebuilt monolithic systems into clean microservices and migrated core systems to AWS Lambda serverless with zero downtime.
- Built automated CI/CD pipelines so developers could ship code safely and predictably.
- Managed departmental budgets, project timelines, and technical KPIs tied directly to business results.

Software Engineer | TICL – PT LB ADS INDONESIA — Jan 2015 – Feb 2016 • Jakarta, Indonesia

- Built custom cloud storage systems utilizing PHP and Laravel framework.
- Introduced Git version control workflows and audited software deliverables from external vendors.

Web Developer | PT. Inti Bangun Sejahtera — Jan 2012 – Jan 2015 • Jakarta, Indonesia

- Introduced CodeIgniter to refactor disorganized native PHP code into maintainable MVC architecture.
- Engineered modular plugin systems to accelerate internal feature deployment cycles.

Graphic Designer | PT. Trans Retail Indonesia — Jan 2010 – Dec 2012 • Jakarta, Indonesia

- Designed marketing collateral, event catalogs, and company publications, establishing early foundations in UI/UX and visual balance.
